

## ENGINEERING SERVICES

StarPoint Engineering Inc. (StarPoint) is a diverse, focused, responsive and innovative full service, integrated multi-disciplinary engineering, procurement, construction management (EPCM) company located in Calgary, Canada. Our team members, on average have 20 years of industry experience which is important when partnering with an EPCM. Our expertise lies in providing FEED Studies and Project & Engineering Management across North America in the following areas: Oil Sands & Mining, Gas Plants, Chemical Plants, Industrial Plants, Compressor and Gathering Stations, Well Pads, Well Sites, Well Tie-ins, Tanks Farms and Oilfield Waste Treatment Facilities for both Greenfield and Brownfield sites and facilities.

In addition to our regular EPCM services, StarPoint also offers its clients:

- 3D Laser Scanning Services using our high end Faros cameras
- Pipeline Compliance Services
- Trenchless Design Services

### Benefits and Advantages of 3D Laser Scanning:

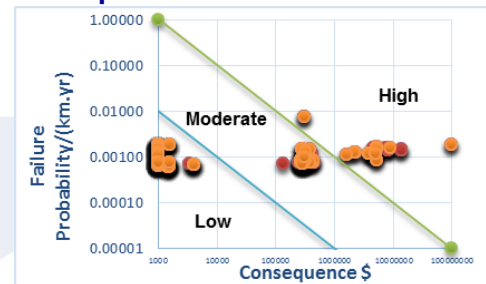

- Reliable, Safe, Accurate and Fast data collection
- Rapid and accurate development of “true built” documentation
- The smallest details can be captured in highly congested areas
- Clash detection errors caught ahead of time
- Improved project visualization and collaboration

### Benefits and Advantages of Pipeline Compliance

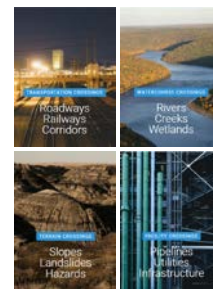

- We develop, in collaboration with our clients, customized, “Fit for Purpose” Pipeline Integrity Management Systems (PIMS), supporting procedures & work instructions and Pipeline Operations and Maintenance Manuals (POMM)
- We work with and for you with the local regulators to ensure that you stay within compliance at all times
- Our proprietary software for Risk Assessment and Corrosion Prediction was developed in-house and uses locally collected data

### Pipeline Risk Assessment

### Benefits and Advantages of Trenchless Design Services:

- A dedicated trenchless services group focused on trenchless design, procurement and construction management
- Fully integrated services from design, procurement through construction management
- Our experience includes several hundred designed and executed projects across North America and in all terrains and environments
