

PIPELINE COMPLIANCE SERVICES

StarPoint Engineering Inc. develops in collaboration with its clients, pipeline integrity management systems, supporting procedures and work instructions along with a pipeline operations maintenance manual to ensure compliance with local regulatory requirements. Turning regulatory requirements into a business benefit is a unique approach that StarPoint Engineering adopts to ensure the integrity of your pipelines throughout their life cycle.

StarPoint Engineering's Pipeline Compliance Services include:

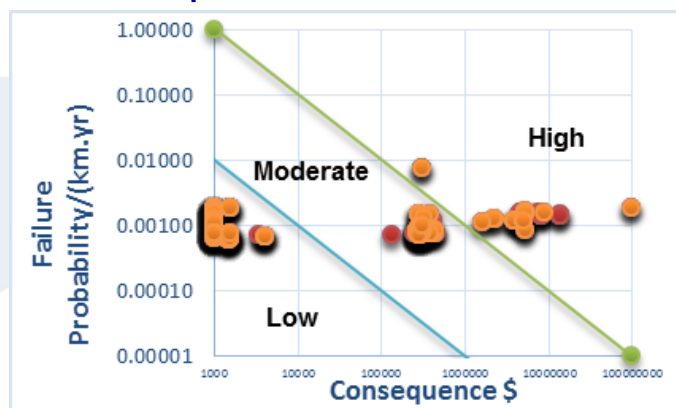

- Developing and implementing a collaborative Pipeline Integrity Management System (PIMS) with supporting procedures and work instructions or "Cold Eyes" review of current system
- Developing and implementing a collaborative Pipeline Operations Maintenance Manual (POMM)
- Providing Risk Assessment and Corrosion Prediction utilizing in-house proprietary software – built with locally collected data provided to AER and BCOGC by pipeline owners
- Support with Pre- and Post-Regulatory Audits
- Support with Pre-Purchase Pipeline Compliance Assessments
- Support with Pipeline License Review and Renewal
- Support with Pipeline Classification and Declassification

StarPoint Engineering's Pipeline Compliance Services' advantages:

- We develop, in collaboration with our clients, customized, "Fit for Purpose" Pipeline Integrity Management Systems (PIMS), supporting procedures & work instructions and Pipeline Operations and Maintenance Manuals (POMM)
- We provide first class training – both for office and field staff to ensure that each and every employee and contractor working within the system knows and understands their responsibilities within the PIMS and POMM framework
- We work with and for you with the local regulators to ensure that you stay within compliance at all times
- Our proprietary software for Risk Assessment and Corrosion Prediction was developed in-house and uses locally collected data

Pipeline Risk Assessment

To reduce your risk and ensure compliance with local regulatory requirements, you need help and support from people with experience. StarPoint Engineering's regulatory compliance professionals have a long track record of serving energy companies in Western Canada. We help you navigate the complexities of regulatory requirements, so you can maintain focus on your top priority: managing your business. We have a trusted, highly skilled team of experts with knowledge and experience in all aspects of the oil and gas industry including a thorough knowledge of all applicable regulations.
